

WORKSHEET B

Title	The users/learners and their strategies	
Objective(s) effectiveness	To observe and to discuss different learning strategies and their effectiveness	
Keywords	Strategies – autonomy – communication – avoidance – achievement	
Ref to the Guide I. 4	Ref to the CEFR 4.4	
Task A (†) or († †)		
Step 1		
Observe language lessons of a selected group of learners for a certain period of time in order to collect data concerning their strategy use. Note down examples of any learning strategies used by the learners.		
Step 2		
Think about the ratio between avoidance and achievement strategies. Which ones are used more often and in which situations?		
Task B († †) or († † †)		
Strategy training should be a conscious and explicit process incorporated in language learning and teaching. With your colleagues consider how learning strategies and their effectiveness could be discussed with learners. Design an action plan you could use with a selected group of learners to encourage them to apply more achievement strategies in their language production.
